ANATOMY 3 NEUROANATOMY MOCK 1

1- The central nervous system consists of:

A- The spinal cord and its ganglia
B- The brain and the spinal cord
C- The brain, spinal cord and cranial nerves
D- The brain only

2- Which division controls voluntary actions?

A- Somatic nervous system
B- Autonomic nervous system
C- Parasympathetic system
D- Sympathetic system

3- Which cells line the ventricles and help produce CSF?

A- Astrocytes
B- Oligodendrocytes
C- Ependymal cells
D- Satellite cells

4- What separates the two cerebral hemispheres?

A- Tentorium cerebelli
B- Falx cerebri
C- Falx cerebelli
D- Diaphragma sellae

5- Where is the insula?

A- Deep in the lateral sulcus
B- In the floor of the third ventricle
C- Under the corpus callosum
D- On the medial surface of the occipital lobe

6- What is the main role of the corpus callosum?

A- Relaying sensation to the cortex
B- Connecting the two hemispheres
C- Controlling posture
D- Producing CSF

7- The lentiform nucleus is made of:

A- Subthalamic nucleus and substantia nigra
B- Caudate and globus pallidus
C- Caudate and putamen
D- Putamen and globus pallidus

8- Where is Wernicke's area?

A- Occipital pole
B- Inferior frontal gyrus
C- Posterior superior temporal lobe
D- Postcentral gyrus

9- The diencephalon lies around which cavity?

A- Fourth ventricle
B- Third ventricle
C- Cerebral aqueduct
D- Lateral ventricles

10- What forms the posterior wall of the foramen of Monro?

A- The caudate head
B- The anterior pole of the thalamus
C- The fornix
D- The pulvinar

11- The hypothalamus forms:

A- The lateral wall of the lateral ventricle
B- The floor of the third ventricle
C- The roof of the third ventricle
D- The floor of the fourth ventricle

12- When does the pineal gland secrete melatonin?

A- In response to darkness
B- During exercise
C- After meals
D- In response to light

13- What are the parts of the brainstem from above downwards?

A- Medulla, pons, midbrain
B- Pons, midbrain, medulla
C- Thalamus, midbrain, pons
D- Midbrain, pons, medulla

14- Where is the tectum?

A- In front of the cerebral aqueduct
B- Behind the cerebral aqueduct
C- In the pons
D- In the floor of the fourth ventricle

15- Where does the abducens nerve (VI) emerge?

A- Cerebellopontine angle
B- Pontomedullary junction, close to the midline
C- Dorsal midbrain
D- Lateral mid pons

16- Which nerves emerge behind (dorsolateral to) the olive?

A- XII
B- IX, X and XI
C- VI and VII
D- III and IV

17- What separates the cerebellum from the pons and medulla?

A- Tentorium cerebelli
B- Third ventricle
C- Cerebral aqueduct
D- Fourth ventricle

18- Which part of the cerebellum is the oldest?

A- Anterior lobe
B- Lateral hemispheres
C- Flocculonodular lobe
D- Posterior lobe

19- Where do climbing fibres come from?

A- Spinal cord
B- Pontine nuclei
C- Vestibular nuclei
D- Contralateral inferior olivary nucleus

20- Where does the spinal cord end in adults?

A- S1
B- L3–L4
C- T10
D- L1–L2

21- What do the dorsal (sensory) roots come from?

A- The marginal zone
B- Mesoderm
C- Neural crest cells
D- The basal plate

22- Where are the lateral horns found?

A- T1–L2 and S2–S4
B- Only in the coccygeal cord
C- Only in the cervical cord
D- Throughout the cord

23- Which cells produce myelin in the peripheral nervous system?

A- Microglia
B- Astrocytes
C- Oligodendrocytes
D- Schwann cells

24- The epithalamus lies in relation to:

A- The frontal horn of the lateral ventricle
B- The floor of the third ventricle
C- The posterior roof of the third ventricle
D- The floor of the fourth ventricle

25- Which nerve emerges between the pyramid and the olive?

A- Hypoglossal (XII)
B- Glossopharyngeal (IX)
C- Abducens (VI)
D- Vagus (X)

ANSWER KEY

1- B
2- A
3- C
4- B
5- A
6- B
7- D
8- C
9- B
10- B
11- B
12- A
13- D
14- B
15- B
16- B
17- D
18- C
19- D
20- D
21- C
22- A
23- D
24- C
25- A
